FDA CERTIFICATION

6002 Polyethylene Film

The raw material used to produce 6002 polyethylene film meets the requirements of the Food and Drug Administration Title 21 CFR section 177.1520 for use in the manufacturing of articles that contact food except for articles used for packaging or holding food during cooking. 6002 Polyethylene may also be used in the contact with meat or poultry products. If you have any further questions regarding compliance with FDA/USDA regulations feel free to contact Multi-Plastics' customer service department.

Sincerely,

A handwritten signature in black ink, appearing to read 'Philip Pappajohn', written over a horizontal line.

Philip Pappajohn – Director of Research & Development – Multi-Plastics, Inc.
